Exam : 920-481

Title : CallPilot ris.5.0 Unified Messaging

Vendors : Nortel

Version : DEMO

NO.1 A customer plans to install multiple CallPilot RIs. 5.0 servers and a separate web server for CallPilot administration, My CallPilot, and CallPilot Reporter into their Private Branch Exchange (PBX) network.

They want to use Audio Messaging Interface Specification (AMIS) and Enterprise Networking solutions to

connect all the CallPilot servers. They also require CallPilot Reporter to determine whether AMIS and

Enterprise Networking have access to sufficient channel resources for the networking traffic load. Which

report meets their needs?

- A. Productivity report
- B. Networking Activity report
- C. Service Quality Detailed report
- D. Open Networking Activity report

Answer: B

NO.2 A customer plans to install multiple CallPilot RIs. 5.0 servers and a separate web server for CallPilot

administration and My CallPilot application into their Private Branch Exchange (PBX) network. They want

to use Application Builder to create a customized fax application to meet their fax needs.

Once the fax

application is created, they want to reuse some parts of that application in another application. Which two

procedures will allow the call handling functions to be used in another application? (Choose two.)

- A. Save the fax application under a different ID and assign different channels to it.
- B. Save the fax application under a different ID and assign the same channels to it.
- C. Copy the blocks that you want to reuse from the fax application and paste them into another application.
- D. Save the group of call handling functions that you want to reuse as a separate application and import it into other applications.

Answer: CD

NO.3 A customer has a CallPilot system on a 1002rp server with 2 MPB16-4 cards. The

customer has

decided to migrate the system beyond the current 96 channels to support fax. Which hardware changes must be implemented?

- A. Install an additional hard drive.
- B. Remove the MPB16-4 cards and install 2 MPB96 cards.
- C. Remove the associated MGate cards and the 7-drop cable.
- D. Remove the RAID configuration.

Answer: B

NO.4 A growing company is considering the deployment of a CallPilot RIs. 5.0 solution on their Private

Branch Exchange (PBX) network that is using an Electronic Switched Network (ESN) dialing plan.

However, they are concerned that deploying a CallPilot solution may require changes to their PBX

network because the PBX is currently running close to its engineering capacity limit. Which data is

required to determine if the network can handle the anticipated messaging traffic?

- A. trunk utilization data
- B. switch utilization data
- C. channel utilization data
- D. Trunk Group Access Restriction (TGAR) data

Answer:A

NO.5 A customer has moved to a new facility. A CallPilot RIs. 5.0 server will be replacing a Meridian Mail with

a Symposium Call Center Server. What is the required step?

- A. Collect the user data and voice segment data.
- B. Collect menu segments and voice segments.
- C. Collect announce segments and menu segments.
- D. Collect the voice segment data and menu call flow data.

Answer:A

NO.6 A customer plans to install multiple CallPilot RIs. 5.0 servers into their Private Branch Exchange (PBX)

network. They are concerned that unauthorized users may hack the mail system and hear confidential

information. Which two security measures should you recommend to increase mailbox security? (Choose two.)

- A. Increase the password length for mailboxes.
- B. Force mailbox users to use a prefix on changed passwords.
- C. Force the mailbox users to use both letters and numbers for their passwords.
- D. Increase the number of mailbox password changes before users can reuse passwords.

Answer:AD

NO.7 Your customer plans to install a new CallPilot RIs. 5.0 system (1005r server) on their multi-site Private Branch Exchange (PBX) network. They have Microsoft Office XP installed on the client desktops. They want to use a CallPilot tool that will allow users to send CallPilot messages using the voice and fax number fields directly from Microsoft Outlook Contacts both to CallPilot and non-CallPilot users. Which application provides this functionality?

- A. My CallPilot
- B. CallPilot Reporter
- C. Desktop Messaging
- D. Lotus Notes or Microsoft Outlook

Answer: C

NO.8 A customer has a Meridian Mail 11 that has many voice segments and fax items. They want to migrate from Meridian Mail to CallPilot RIs. 5.0 to obtain the messaging functionality of CallPilot. However, they are concerned about data being lost during the migration of the Meridian Mail to CallPilot. What is the guideline for this type of migration?

- A. Perform the migration in one session, migrate all voice segments and fax items to CallPilot, and then create the applications using Application Builder before migrating the remaining data.
- B. Perform the migration in multiple sessions, migrate all voice segments and fax items to CallPilot, and then create the applications using Application Builder before migrating the remaining data.
- C. Perform the migration in one session and create call flow in CallPilot and then migrate

voice segments

and fax items from Meridian Mail to import into applications.

D. Perform the migration in multiple sessions, create call flow in CallPilot, and then migrate voice

segments and fax items from Meridian Mail to import into applications.

Answer: B

NO.9 Your customer relies heavily on the CallPilot servers to exchange messages between sites. Due to the

volume of the traffic, the company needs to account for each department's usage. Which bill-back report

would you recommend the company regularly generate?

A. Network Usage to track long distance charges

B. Messaging Usage to track activity on mailboxes

C. DTT Usage to track telephone activity to user or department

D. Remote Notification (RN) Usage to track the cost of outcalling by mailbox

Answer:A

NO.10 A customer has CallPilot RIs. 5.0 servers located in several locations. They use Active Directory to

track employees' information. They would like to have a single administrator for all locations and use the

data in Active Directory. Which two features/services would accomplish this? (Choose two.)

A. My CallPilot

B. pcAnywhere

C. CallPilot Manager

D. Directory synchronization

Answer: CD
