Latest Exam Guide & Learning Materials

**Exam :** C2070-588

**Title :** IBM Certified Solution Designer -  
Datacap Taskmaster Capture V8.1

**Vendors :** IBM

**Version :** DEMO

NO.1 A customer has images that have machine print as well as handwritten data on the image. Is it necessary to have an OCR\_s or OCR\_a engine as well as an ICR engine to extract/read data from the image, and why?

- A. Yes, both OCR\_s and ICR\_c engines will have to be used.
- B. No, ICR\_c engine works well with hand-printed and machine-printed text.
- C. No, OCR\_s engine works well with hand-printed and machine-printed text.
- D. No, OCR\_a is the only engine that can read hand-printed and machine-printed text.

**Answer:** B

NO.2 The solution designer is creating a standalone FastDoc application and needs to add a workflow. What construct is created to contain the workflow?

- A. Task Profile
- B. Batch Profile
- C. Batch monitor
- D. FastApp template

**Answer:** B

NO.3 An IBM Datacap Taskmaster Capture system is being architected to support a large capture processing operation consisting of 500 dedicated Taskmaster web users located in the same facility. What is the minimum recommended number of Microsoft IIS instances?

- A. Two
- B. Three
- C. Four
- D. Five

**Answer:** D

NO.4 A company is experiencing some batch aborts that have been traced to recognition failure in the OCR engine. What is the recommendation to alleviate this?

- A. Use managed recognition.
- B. Switch to another engine that will sacrifice accuracy for stability.
- C. Check to make sure that the input images are oriented correctly.
- D. Check the image file sizes. OCR will not work on images bigger than 82.3K. A lower resolution will be required.

**Answer:** A

NO.5 An IBM Datacap Taskmaster developer has a specific page type which needs custom verify panels to be created for both thick client and web interfaces. Which Datacap components can the developer leverage to display custom verify interfaces to the end user?

- A. FastDoc for thick client and AVerify.aspx for web.
- B. DotEdit for thick client and VeriFine.aspx for web.
- C. DotScan for thick client and ImgEnter.aspx for web.
- D. Batch Pilot for thick client and AIndex.aspx for web.

**Answer:** B

NO.6 A customer scans in a document and the template is not recognized within the IBM Datacap Taskmaster Capture application. What happens when the image or page is not identified?

- A. The unidentified page is classified as "Default."
- B. The unidentified page is removed from the DCO.
- C. The page is classified as the previous identified page.
- D. The page is classified as "Other" and has to be otherwise identified.

**Answer:** D

NO.7 Which of the following is NOT an "out of the box" export target for IBM Datacap Taskmaster Capture?

- A. Microsoft SharePoint
- B. Microsoft SQL Database
- C. Open Text Cloud Storage
- D. IBM Content Manager (CM8)

**Answer:** C

NO.8 For optimal testing results of fingerprints created with AnalyzeImage, which of the following image processing settings is NOT required?

- A. Deskew
- B. Line removal
- C. Dot Removal
- D. Border removal

**Answer:** B

NO.9 A customer has remote users that will be scanning in paper documents for their IBM Datacap Taskmaster applications outside of their office network. What is the BEST method of ingestion for the customer's application?

- A. Use the Taskmaster Web client to scan and then upload the documents, using a TWAIN driver .
- B. Use Taskmaster DotScan using ISIS or TWAIN scanner for the remote user to scan in new batches.
- C. Use a fax machine where remote user fax images to a Rightfax server which is ingested by a RuleRunner server using a OpenTextFaxServer task.
- D. Use a third party application with a scanner for the remote user who then upload the images to a network folder which is ingested by a RuleRunner server using VScan task.

**Answer:** A

NO.10 The IBM Datacap Taskmaster Capture Studio Test tab provides all EXCEPT the following runtime processing information?

- A. Log file contents
- B. Recognition zones
- C. Custom action code
- D. Batch hierarchy variables

**Answer:** C

NO.11 The client requirements outline the need to return documents to the original scan operator

(or department) for verification. What task detail settings will provide this functionality?

- A. Mode: Router and Store: User ID
- B. Queue by: User and Store: None
- C. Mode: Router and Queue by: User
- D. Queue by: User and Store: User ID

**Answer:** D

NO.12 A solution designer is using the Application Wizard to create a new project. What are some of the object types, within the hierarchy, that are created by default?

- A. Document, Page and Field
- B. Batch, Document Separators, Page
- C. Variables, Document, Page and Field
- D. Main Page, Trailing Page and Other Page

**Answer:** A

NO.13 A customer has more than 200 types of documents to be scanned using IBM Datacap Taskmaster Capture. Some documents have more than 100 index fields that need to be captured. How many documents / pages / fields can be created in the DCO?

- A. Unlimited documents / pages / fields
- B. Limited to 50 documents / pages / fields
- C. Limited to 10 documents / pages / fields
- D. Limited to 100 documents / pages / fields

**Answer:** A

NO.14 When IBM Datacap Taskmaster Capture converts a single multi-page file to individual a TIFF file, what determines the maximum number of files that are created and output using the Convert library actions?

- A. The SetMaxImageFiles action determines the maximum.
- B. There is no restriction on the maximum number of output files.
- C. Inherently a maximum of 1,296 individual TIFF files can be output.
- D. Individual Convert actions properties determine the maximum number of output files.

**Answer:** C

NO.15 A race condition can occur when two or more threads are able to access shared data. Which statement is TRUE about the automated vscan task?

- A. By default all batch creation tasks are synchronized in memory and can run simultaneously without conflict.
- B. Batch creation tasks from two different applications looking in the same input folder can run simultaneously without conflict.
- C. Batch creation tasks from two different applications looking in two different input folders can run simultaneously without conflict.
- D. Batch creation tasks from a single application but in separate jobs looking in the same input folders can run simultaneously without conflict.

**Answer:** C
